DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Wendkos et al. (US 6,453,299).

Regarding claim 1, Wendkos teaches identifying an advertiser and an associated payment offer having one condition; associating an expected value payment (EV), and a corresponding Payoff, with the recipients; determining acceptance of the offer by recipients; selecting at least one of the recipients at random, with the probability being set to EV/Payoff (see col. 3 lines 28-54, col. 12 lines 11-27); determining whether the selected recipients satisfies one condition and based on positive determination, providing the Payoff to the selected one of the recipients (see col. 11 line 3 to col. 12 line 10 and col. 13 lines 51-60).

Conclusion
